-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Objections

1. Claims 1, 4, 13 and 26 are objected to because of the following informalities:

Claim 1, line 4, "passageway" should read --passage-- for consistency purposes.

Claim 4, line 2, it is suggested to change the terms "wall" to --surface-- (both occurrences) for consistency purposes with the specification. See particularly, reference numerals 30, 32 designating first and second inner surfaces on p. 4, lines 9-10.

Appropriate correction should also be made back in claim 2 on this issue.

Claim 13, the recitation that said "dust gutter extends outwardly from" is redundant of that already recited back in claim 1 at line 7.

Claim 26, line 4, "passageway" should read --passage-- for consistency purposes.

Claim 26, line 7, "passageway" should read --passage-- for consistency purposes.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 26 is rejected under 35 U.S.C. 103(a) as being unpatentable over Restivo D296,022 in view of Harris et al. 5,235,722 (hereinafter Harris).

Restivo D296,022 discloses a fan blade cleaning tool in Figs. 1-5 comprising a housing having at least one opening and a passage extending from said at least one opening into said housing for receiving a fan blade, first and second cleaning pads disposed inside said passage, said first and second cleaning pads having first and second planar cleaning surfaces, respectively, for contacting opposing sides of fan blade when the fan blade is moved through said passage, and said first and second cleaning pads arranged with substantially no gap **at right and left ends shown in front view in Fig. 1** between said first and second planar cleaning surfaces so that the fan blade deforms the first and second cleaning pads when inserted therebetween. Restivo D296,022 discloses all of the recited subject matter as set forth above with the exception of a dust gutter disposed adjacent to said at least one opening and extending outwardly therefrom so that force from said first and second cleaning pads removes dust from the fan blade and the removed dust falls into said dust gutter.

The patent to Harris discloses a fan blade cleaning tool comprising a dust receptacle or gutter 17 that extends outwardly (Figs. 1 and 3; col. 2, lines 17-21). It would have been obvious to one of ordinary skill in the art to have provided the Restivo D296,022 tool with a dust gutter that extends outwardly as taught by Harris for the purpose of collecting dust removed by the tool when cleaning a fan blade as well as

preventing dust from falling on an operator.

Allowable Subject Matter

4. Claims 1-23 would be allowable if rewritten or amended to overcome the above objections set forth in this Office action.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
